

COUNTY SELECTION RUBRIC

Land Profit Generator Method — 6-Step Screen

1 Pick State — Disclosure Check

GO Full disclosure state (sale prices public)

CAUTION Non-disclosure — harder comps, skip if starting out

Non-disclosure: **TX, ID, UT, AK, MS, ND, KS, LA, MO, MT, NM, WY**

2 Target Metro — Population ≥ 750K

Find the nearest metro (MSA) to your target county.

GO Metro pop ≥ 750K (ideally 1M+)

NO-GO Metro pop < 750K

Source: Google "[city] metro area population" or Census MSA tables

3 Donut Distance — 30 to 100 Miles

Measure driving distance from metro center to county seat.

TOO CLOSE < 30 mi — land too expensive

SWEET SPOT 30–100 mi — growth expansion zone

TOO FAR > 100 mi — buyer pool thins out

Use Google Maps "Measure distance" · Metros expand outward — be ahead of the growth, not in it

4 Infrastructure & Topography

Google Maps satellite view — scan for red flags:

AVOID No road grid (landlocked), desert, aggressive slopes

GO County roads on grid, usable terrain, low flood risk

Ask: "Is there an obvious reason people wouldn't want to live here?" · Check FEMA flood map (msc.fema.gov)

5 Sold-to-Active Ratio (Zillow) — 20% to 130%

Zillow → **Lots/Land only** → your acreage range (1–5 ac).

Active: "For Sale" → any days → record total. **Sold**: "Sold" → 12 months → record total.

Formula: $\text{Sold} \div \text{Active} \times 100 = \text{STR}\%$

DEAD STR < 20% — market too slow, land sits

IDEAL STR 20–130% — competitive balance

HOT STR > 130% — seller's market, may overpay

LOW SAMPLE Sold count < 50 — insufficient data, skip

Cross-check on Redfin — if within 25%, average them. If not, investigate.

6 Market Values — \$5K to \$300K Sweet Spot

Same Zillow filter — sort by price, scan the distribution.

GO 50%+ of listings priced **\$5K–\$300K**

TOO CHEAP Most < \$5K — profit eaten by fixed costs

TOO PRICEY Most > \$300K — complex deals, slow turns

Best sweet spot: **\$10K–\$100K** for rapid acquisition & sale

QUICK SCORECARD — FILL IN PER COUNTY

County / State	_____
Disclosure?	Y / N
Nearest Metro (pop)	_____ (____K)
Distance to Metro	_____ mi
Infrastructure OK?	Y / N
Active / Sold (12mo)	____ / ____
STR %	_____ %
Median Price	\$ _____
Verdict	GO / MAYBE / NO-GO

LPG Module 2 + Jack Bosch Criteria · Target: 15 counties across 2–3 states · Start 500–750 mailers/county to test
