

CRM COMPARISON — QUICK REFERENCE

Land Business · Marcus + Chris · June 11, 2026 · Full doc: [crm-comparison.html](#)

RECOMMENDATION: Start with **Airtable (Free) + PropStream** already budgeted = **\$0 new CRM cost**. Reassess after 5–10 closed deals. If structure becomes a bottleneck, upgrade to **REIPro Standard \$69/mo annual**.

WHY AIRTABLE WINS (PHASE 1)

- **No address-required friction** — raw land runs on APNs; every dedicated REI platform was built for houses
- **Gerald integrates cleanly** — full REST API, no Zapier middleware tax
- **PropStream already covers data** — skip tracing + lead exports are redundant on dedicated platforms
- **Effectively \$0 to start** — free tier handles 1,000+ records per base
- **Auditability** — every change timestamped, full revision history, no black boxes
- **Paul Brewer's land template** exists — pre-built base for property tracking, mailing, ad posting

WHAT TO SKIP & WHY

- **FreedomSoft** — built for house wholesaling; BBB D- rating; add-ons (\$997 MailNow, \$297 Dig Tool) bloat cost; aggressive upselling reported
- **REsimpli Pro** — confirmed address-required bug for raw land (BiggerPockets 2023 thread); \$299/mo is most expensive; only plan with 2-user support
- **Investment Dominator** (LPG default) — already dismissed by Chris: overpriced, workflow-locked, frequent support issues

PHASE 2 TRIGGER (REASSESS WHEN)

- 5–10 closed deals completed
- Workflow structure becomes the bottleneck
- Then upgrade to: **REIPro Standard \$69/mo annual** — cheapest dedicated platform, 3 users, 10-step framework
